Acknowledgments

Praise to "Allah", the Most Gracious and the Most Merciful Who Guides Us to the Right Way.

I would like to express my endless gratitude and appreciation to ***Prof. Dr. Maha Abdel Hamid Ghanem,*** *Professor of Forensic Medicine, and Clinical Toxicology, Faculty of medicine, University of Alexandria for giving me the honor of working under her supervision and providing me with a lot of encouragement and support.*

My special thanks and deep gratitude to ***Prof.Dr. Aida Mohey Mohamed,*** *Professor of Community Medicine and public health, Faculty of medicine, University of Alexandria, for her generous assistance and valuable guidance and unfailing efforts during the whole period of the study.*

This work would have never been completed without the great help, close supervision offered by ***Assist. Prof. Dr. Naglaa Hassan,*** *Assistant Professor of Forensic Medicine, and Clinical Toxicology,, Faculty of medicine, University of Alexandria,*

I'm also thankful to all staff members and to my colleagues in the Emergency Department for their help.

I'm also thankful to all patients were included in the study for their participation and great help.

LIST OF TABLES

Table		Page
I.	Physical and chemical properties of ethanol	1
II.	Physical and chemical properties of methanol	2
III.	Alcohol-Drug Interactions	17
IV.	physical and behavioral changes in relation to alcohol level: Blood Alcohol Level Chart	22
V.	Ability of drinking alcohol in relation to sex	23
VI.	Blood alcohol concentrations (BAC) in different countries	24
VII.	Distribution of the studied cases according to demographic data.	41
VIII.	Distribution of the studied cases according to conscious level and their grading according to GCS	45
IX.	Distribution of the studied cases according to clinical signs	46
X.	Distribution of the studied cases according to grading of toxicity	48
XI.	Distribution of the studied cases according to heart rate and blood pressure (n=69)	49
XII.	Distribution of the studied cases according to time laps	51
XIII.	Distribution of the studied cases according to way of referral and transportation	52
XIV.	Distribution of the studied cases according to medical care parameters	54
XV.	Distribution of the studied cases according to risk of HF and Infarction.	54
XVI.	Distribution of the studied cases according to admission to hospital (n=69)	56
XVII.	Distribution of the studied cases according to investigations	58
XVIII.	Distribution of the studied cases according to ECG changes (n=69).	63
XIX.	Distribution of the studied cases according to CT brain (n=69)	65
XX.	Distribution of the studied cases according to smoking	66
XXI.	Distribution of the studied cases according to co – administration	67
XXII.	Distribution of the studied cases according to outcome (n=69)	69
XXIII.	Distribution of the studied cases according to management (1st aid)	71

LIST OF FIGURES

Figure		page
(1)	Distribution of the studied cases according to sex	**42**
(2)	Distribution of the studied cases according to age	**42**
(3)	Distribution of the studied cases according to marital status	**43**
(4)	Distribution of the studied cases according to education	**43**
(5)	Distribution of the studied cases according to occupation	**44**
(6)	Distribution of the studied cases according to residence	**44**
(7)	Distribution of the studied cases according to GCS	**45**
(8)	Distribution of the studied cases according to clinical signs	**47**
(9)	Distribution of the studied cases according to grading of toxicity	**48**
(10)	Distribution of the studied cases according to heart rate	**50**
(11)	Distribution of the studied cases according to blood pressure	**50**
(12)	Distribution of the studied cases according to time laps since seeing a physician	**51**
(13)	Distribution of the studied cases according to way of referral and transportation	**52**
(14)	Distribution of the studied cases according to primary medical care parameters	**55**
(15)	Distribution of the studied cases according to risk of HF and infarction	**55**
(16)	Distribution of the studied cases according to hospital admission	**56**
(17)	Distribution of the studied cases according to blood glucose level mg/dl	**59**
(18)	Distribution of the studied cases according to PH	**59**
(19)	Distribution of the studied cases according to HCO3 (meq/l)	**60**
(20)	Distribution of the studied cases according to PCO2	**60**
(21)	Distribution of the studied cases according to PO2	**61**
(22)	Distribution of the studied cases according to sodium	**61**
(23)	Distribution of the studied cases according to potassium	**62**
(24)	Distribution of the studied cases according to ECG changes	**64**
(25)	Distribution of the studied cases according to CT brain	**65**

LIST OF ABBREVIATION

ABG	**:**	Arterial blood gases
ABV	**:**	Alcohol blood volume
ACD	**:**	Alcoholic cerbellar degeneration
ADH	**:**	Alcohol dehydrogenase
AMI	**:**	Acute myocardial infraction
AMUH	**:**	Alexandria Main University Hospital
AODs	**:**	Alcohol or other drugs
ARDS	**:**	Adult respiratory distress syndrome
BAC	**:**	Blood alcohol concentration
BG	**:**	Blood glucose level
CHD	**:**	Congestive heart disease
CNS	**:**	Central nervous system
CO_2	**:**	Carbon dioxide
CT	**:**	Computerized tomography
CVD	**:**	Cardiovascular disease
DCL	**:**	Disturbed conscious level
DT	**:**	Delirium tremens
ECG	**:**	Electrocardiography
ED	**:**	Emergency Department
ET	**:**	Endotrachial tube
FPM	**:**	First pass metabolism
GABA	**:**	Gamma-aminobutyric acid
GCS	**:**	Glascow coma score
GI	**:**	Gasterointestinal
HCO_3	**:**	Bicarbonate
HE	**:**	Hepatic encephalopathy
I.M	**:**	Intramuscular
I.V	**:**	Intravenous
ICU	**:**	Intensive Care Unit
K^+	**:**	Potassium
MRI	**:**	Magnetic resonance imaging
NA^+	**:**	Sodium
NAD	**:**	Nicotinamide adenine dinucleotide
NMDA	**:**	N-methyl-D-aspartati
NPO	**:**	Nothing by mouth
O_2	**:**	Oxygen
PET	**:**	Positron emission tomography
PS	**:**	Permeability surface area
